Roadtrek

The Motor Home That... *Drives Like a Van!*
The captain’s seats are made using the same High Resilience Molding (HRM) process by automobile manufacturers. Most other RV manufacturers cut foam and glue it together to achieve the seat’s desired shape which is prone to early breakdown and loss of shape and comfort. The HRM process makes each component one consistent piece of molded foam which will retain its shape and support for years to come.

For more storage on vacations, remove the seat behind the driver and install our removable wardrobe. Just as easily, remove the wardrobe, return the lounge seat and you have seating for 4 up front again.

You can never have too much storage space, so Roadtrek’s “across the rear” storage area gives you a lot more.

(depending on the model). Dual-density foam mattresses give the feel of box springs to guarantee sweet dreams without a lump, bump or sag.

It’s Time

You can feel it. Now is your time to invest in a Roadtrek and go exploring. Whether you’re a weekend wanderer or setting off on the cross-country adventure of a lifetime, in a Roadtrek Motor Home Van you can take the comforts of a larger Class ‘A’ or ‘C’ motor home with you in a vehicle that handles like the family wagon.

Room to manoeuvre

No need to crouch in a Roadtrek. By raising the roof with the exclusive custom fiberglass roof AND lowering the floor, there’s plenty of headroom for people up to 6-feet tall. The aisle is a full 30” wide so 2 people can pass easily and when the driving is done, just swivel the captain’s seats around to create a comfortable roomy living area.

Comfort comes first

Slide into the front captain’s seats and your back is instantly cradled by adjustable lumbar supports that were orthopedically designed in Austria — the same supports used by Porsche and Mercedes. Nothing is sacrificed when it comes to your comfort.

When the day is done, your Roadtrek can sleep up to 4 in superior comfort. One or 2 single beds up front and up to a king-size bed in the rear

Privacy when needed

The secret to privacy in a Roadtrek is that you can create it when you want it and then simply store it away when you don’t.

Instead of forcing you into a small permanent bathroom as is the case in even larger motor homes, Roadtreks let you create a spacious temporary bathroom. When not needed, the marine-type toilet is concealed within the closet — completely out of the way.

The same folding closet doors that create the bathroom privacy area can be used to separate sleeping quarters when the sun goes down. Yet, because it is centrally located, the bathroom is accessible from either sleeping compartment.

Privacy. It’s yours when you want it in a Roadtrek.
The cab is also living area for eating or entertaining. Our patented cloverleaf table with extendible leaves combines the large surface area of a kitchen table with the compact convenience of a smaller table.

Storage space abounds

Inside a Roadtrek, from front to back, space is thoughtfully utilized. A major reason Roadtrek has so much storage to offer is that the water tanks are made to fit below the floor — not inside the living compartment. When equipped with an over-cab storage drawer and removable wardrobe, the 190-Versaite has 75 cubic feet of storage space. The 210-Popular offers up to 96 cubic feet — the most in a low profile camper van. And there’s even more integrated into the running boards.

Every Roadtrek offers a 7 - 13 cu. ft. waterproof storage compartment integrated into the running boards. For added convenience, there’s even an exterior shower.

Easily accessible by flipping up the driver’s door step, our patented “Dura Drain” sewage hose system provides a permanently attached sewage hose that eliminates messy banding and storage. Also located here are the waste water tank releases, LP gas fill and gauge plus the fresh water tank drain.
Roadtrek is the most aerodynamically efficient camper van there is. Sleek lines, low profile and light weight optimize fuel efficiency and handling.

**Stretching a dollar**

Fuel efficiency depends upon aerodynamics, overall weight and engine efficiency. Compare the aerodynamics of a Roadtrek with larger Class 'A' and 'C' cousins as well as high-top Class 'B's and see why Roadtreks are in a class by themselves.

The low, sweeping roof profile raises wind up over the highest point and then effortlessly along the rearward slope and down the tapered rear of the vehicle. To minimize drag, all hoses, connections, power cords and valves are located within the running board storage area. Rather than using a roof-mounted unit, a Roadtrek's air conditioner is built into the rear cabinets to preserve its low, clean roofline with only the flush-mounted grills visible from the rear.

All Roadtrek Motor Home Vans are built using either a Dodge or Chevy van. (Fords are not used as they are incompatible with the requirements of Roadtrek designs.) In all cases, the engine will meet the demands placed on it while delivering performance and peak efficiency.

One look will move you. One drive will prove how effortless, efficient and economical the experience is.

**Innovation on wheels**

With no fewer than 18 Canadian and U.S. patents (and more pending) Roadtrek Motor Home Vans are a testament to original thinking. Nothing is left to chance.

Thanks to our "Integrated Venting System", the refrigerator vent is disguised and integrated into a black louvered grill in the galley window. The fresh water fill is located inside the passenger door to improve both looks and security. Large awning windows, first used in a camper van by Roadtrek, provide superior ventilation and remain functional in the rain without worry of the interior getting wet. Our patented "Dura-Drain" sewage hose system. Patented clover leaf dining table. Patented bathroom/privacy area. Lowered floor. Built-in air conditioner.
Go on excursions deep into the city without worrying about things like parking.

Running boards with integrated storage. Under floor tanks. Shower that doubles as a wardrobe. Dual layer foam beds. The list of intelligent innovations is long, but the one that intrigues the creators of Roadtrek the most is the one still waiting to be discovered.

Practical everyday
With up to 6 forward facing seats, many people use their Roadtrek as their second family vehicle, as well as a family camper. It’s safe, roomy, easy to drive and economical to operate. You can even haul large items. Don’t save your Roadtrek just for vacations. Use it every day.

Get a handle on handling
For all their interior spaciousness, comfort and amenities, Roadtreks remain nimble, responsive and a pleasure to drive. By locating water tanks between the axles for better weight distribution, handling is greatly improved.
They perform on the highway with ease. They take you deep into the woods and out again. They manoeuvre in congested traffic and back into a parking spot without a problem.

The “more than a van” camper van
All the comforts of a larger motor home.
All the ease, peace of mind and efficiency of driving a van. Take to the highway in a

Awning windows provide superior air circulation even during foul weather. The Integrated Venting System provides effective yet inconspicuous ventilation of the refrigerator.

Water tanks fit below the floor which maximizes interior storage space. Locating them between the axles improves weight distribution for better handling.
The galley is equipped with 3.0 cu.ft. refrigerator, microwave oven, LP gas stove, exhaust fan, sink and 6 feet of standing head room. At the rear, choose a dinette or L-shaped lounge with cabinet for TV and video cassette player (similar to 170-Popular).

Large double bed (6'10" x 5'2") of 5" thick dual density foam provides firm, comfortable support. The swivelling TV shelf of all models allows you to watch TV in bed or swing it into the aisle to watch in comfort from the front captain's seat.

190-Versatile

Whether it's just the two of you or the kids come along too, the 190-Versatile is the perfect getaway vehicle for vacations or weekends. It's the affordable alternative to motels and restaurants.

Two captain's seats and 2 forward facing lounge seats offer comfortable seating for 4 during the day. When the day is done, they convert quickly to 2 comfortable single beds.

The rear dinette or L-shaped lounge turns into a large double bed while the privacy doors let you watch television or read without disturbing the sleepers up front.

Hit the beach for a few days or the campground of your choice. With the standard galley and bathroom, it's the ideal way for you and your family to go exploring. And there's an extra dimension of freedom — the added security of an optional sit-down tub and shower. Although less roomy than our stand-up aisle shower, now you can sit down while showering.

And when you're not on the road, the 190-Versatile serves well as the second family vehicle with seating for 4 in forward facing seats (6 with rear L-shaped lounge).

190-Versatile

Living arrangement

Sleeping arrangement

Combination shower/wardrobe gives you sit-down bathing facilities while maintaining valuable closet space. Just swing the wardrobe shelf and rack (with clothes still on hangers) out over the bed, fold down the tub cover and draw the curtain.

In a matter of seconds you can use the optional stand-up shower in the aisle of any Roadtrek model, What other camper van can give you that kind of convenience?
The Popular series offers the flexibility of separate twin beds (6'4" x 30" in the 210, 6'3" x 30' and 6'1" x 30" in the 190) or an enormous king-size bed (6'4" x 6'1" in the 210, 6'3" x 6'1" in the 190). 190 shown, similar in 210.

190-Popular

It's time to hit the road. Just the two of you. Seeing the country close up, on your own terms. No timetable. No tour guides. Sure you want to see the big city lights. But the Northern Lights are just as beautiful so you wouldn't miss them for the world.

As in all Roadtreks, two captain's seats up front keep you as refreshed at the end of a day's drive as you felt at the beginning. Important to know since the day doesn't always end just because the sun goes down.

When it's time to turn in, the dinette converts to either two twin beds (6'3" or 6'1" long) or a huge king-size bed (6'3" long). Your choice.

The full-length wardrobe, pivoting and stowable table and standard galley make this 190 the popular choice for two (or three) of you to get to know your neck of the woods a little better. And be comfortable doing it.

210-Popular

The only 21-foot Class 'B' motor home. The ultimate Roadtrek. You are at that point in your life when you deserve the best. You've worked hard. You've earned it.

Combining twin beds or a king-size bed (both 6'4" long) with front forward-facing seating for 4, the 210 also offers your choice of the aisle shower, the tub and shower or no shower at all.

Loaded with the most room, style, luxury and convenience in a camper van, it doesn't get any better than this.
Our rear L-shaped lounge offers a comfortable place to eat, watch TV, play games or just relax with a good book. It also converts to a double bed.

You can watch TV from the rear lounge or bed with our new TV and VCP cabinet. The sliding swivelling TV shelf allows viewing from the front captain's seats — the most comfortable places to sit. If you don't want a TV on board, it doubles as an excellent storage cabinet.

Van conversions can't compete

In terms of size and overall dimensions, the 170 may appear to be a typical van conversion. Upon closer inspection, however, you will quickly discover the 170 has so much more to offer.

At 17 feet, the 170 is the easiest of all Roadtreks to manoeuvre through traffic and park in tight quarters. You'll enjoy a much more car-like ride with the added safety of a driver's side air bag and 4-wheel anti-lock brakes and even better fuel economy.

Make no mistake though, the 170 is a Roadtrek through and through. It seats and sleeps 5 in comfort that is unmistakably Roadtrek. The rear L-shaped lounge converts easily to a double bed while offering "across the rear" storage below. Our new front dining table swivels quickly out of the way to create more room to stretch out and relax. There is even a custom designed cabinet for a 13" television and video cassette player (VCP) with a sliding, swivelling shelf to accommodate viewing from the front captains chairs.

Add the optional 110-volt air conditioner with ducts to the rear lounge/bed area, 13" television and VCP and any other optional Roadtrek equipment you desire and you have a completely self-contained camper van disguised as the perfect second vehicle. Convenience. Comfort. Quality. Value. The 170 offers the comforts of a larger 190 or 210 but in a smaller, easier-to-handle, more affordable package.

The Home & Park Roadtrek is the result of one man’s determination to get exactly what he wanted in a recreational vehicle.

Having no interest in being a “weekend busdriver” Mr. Jac Hanemaayer of Kitchener, Ontario, knew a full-size Class ‘A’ or ‘C’ motor home was not for him. Yet he was not about to trade the comfort and amenities they offered for the convenience and mobility of a van. Unable to find the best of both worlds in the market, he did what came naturally to him. In 1974, he designed one for himself and had it built by a local camper van manufacturer named Home & Park Vehicles Ltd.

He was so pleased with the result that he bought the company.

Being a true innovator, Mr. Hanemaayer was never content. In 1980, he completely re-designed the vehicle incorporating his now-famous sweeping roof line, lowered floor and three-section floor plan. The Roadtrek Motor Home Van was born.

After numerous refinements that keep it one step ahead of the competition, Roadtrek has grown to become the best selling North American camper van (since 1990) with dealers across North America and Europe!

We try to keep a large selection of finished units on hand so you don’t have to wait long to hit the highway in your new Roadtrek.

Come visit our new 120,000 sq. ft. plant. Tours are available Monday through Friday 10:00 am or 2:00 pm. Closed weekends, between Christmas and New Year and all Canadian holidays. Space is limited so call 1-800-563-0066 to make a reservation.

From Highway 401, take the Highway 8 West exit to Kitchener. Proceed on Highway 7 to Wellington Street East and then to Shirley Avenue. Turn right (south) and follow Shirley to our plant at 100 Shirley Avenue on your right.

**The quality continues**

While Roadtrek is a truly innovative design, its success over the years is attributable primarily to an unwavering commitment to quality.

Every Home & Park Roadtrek meets, and very often exceeds, rigid RVIA and CSA recreational vehicle standards. Each one is individually constructed with painstaking care and attention to the smallest detail.

**Backed with pride**

The best built should be the best backed. Reflecting the confidence we have in our vehicles, we offer an industry leading 3-year or 36,000 mile/60,000 kilometre Motor Home Warranty.

**Loyalty speaks volumes**

In a comprehensive survey of nearly 2000 Roadtrek owners, of those planning to buy another RV, 85% were going to buy another Roadtrek. Many for a second, third and even fourth time. Only 2% intended to buy a different Class ‘B’.

After all, what better vote of confidence could a camper van receive than one given by the people who use it.
Despite growth in sales and expansion of markets, Home & Park is still run by people who have a passionate interest in their product and the people who buy it.

Founder Jac Hanemaayer is still active in the development and refinement of the vehicle he originated. Starting as a summer employee while still a student, his son, Jeff, knows the product and the company inside out. In his position as President, Jeff has overseen much of the company's growth and continues to guide it as Roadtrek's popularity soars to new heights.

To Jac and Jeff, research and development still means taking your product out and using it. Living with it to find those little things that make a good thing even better.

Talking face to face with the people who put their faith, not to mention their hard earned money, in your product.

Their caring brand of customer service doesn’t stop with the sale. The Hanemaayers work very hard to make everyone who owns a Roadtrek feel like they are members of a large “Roadtrekker” family. The after sales service, both from the factory and their superior dealer network, is designed to making owning a Roadtrek a life-long positive experience.

A lot of happy campers

As the number of happy Roadtrekkers grew, a group came together to form Roadtrek International, a North America-wide Roadtrek owners' club. With the ongoing support and assistance of Home & Park, the club became an active chapter (and the only camper van chapter) of the FMCA in February 1993. Since its inception in January 1993, Roadtrek International had grown to a membership of about 900 vehicles (1800 people) by mid-1995 and could very easily become the largest product chapter within the FMCA.

Members enjoy meeting new friends with common interests. They participate in group outings, tours and suppers where they exchange details of their Roadtrek adventures and share ideas on how to improve their Roadtreks. It’s truly a family affair and the Hanemaayers, Jeff and Jac, make a point of personally attending several events throughout the course of a year.

Still driving ahead

With Roadtrek still recognized as the best selling North American camper van, the Hanemaayers aren't about to slow down. With their combination of exceptional employees, high quality and innovative product, state-of-the-art production facility, superior dealer network and habit of treating everyone like family, the “Motor Home That Drives Like A Van” is destined to become the best selling camper van in the world.
COMPLIMENTS OF ROADTREK OWNERS

“We were scheduled to go to the Calgary Stampede and a convention in Spokane, Washington in July with our class ‘A’ motor home. Well, we got our Roadtrek in June and were concerned about a month long trip in a smaller unit. But how great it was: the ease of driving, much more economical, we could go further and faster than 16 other units we were with, and we had everything they had.”

Clarence & Helen Stone, Mobeve Valley, Arizona.

“My (1987) unit is in excellent condition due in no small part to the quality of materials and workmanship. Thank you.”

Karl Hartwick, Bobcaygeon, Ontario.

“We have shown it to people from here (Alberta) to Arizona and they marvel at how much there is packed into so little space.”

Ross & Verna Tomalty, Red Deer, Alberta.

“I have always owned one type of RV or another over the past thirty years, from class ‘A’ to class ‘C’. I consider the Roadtrek the best engineered, developed and constructed RV for its size of any I have ever owned or seen on the market.”

Gary & Jane Alden, Destin, Florida.

“It might be of interest to you that we travelled through 14 countries (including Liechtenstein, Andorra and Gibraltar) and covered 19,000 miles in 32 weeks. We negotiated hairpin turns on narrow roads in the Austrian Alps during ski season, bullied our way through rush hour traffic in Barcelona and cruised easily at 75 mph on German autobahns. In Swedish Lapland the screens kept the mosquitoes out and in Finland and northern Italy we easily negotiated rutted roads to reach our friends’ country houses.”

William Ilmanen, Skaneateles, New York.

In case you were wondering before you go wandering

Whether it’s your first Roadtrek or your fourth, there are always questions that arise. While we are always eager to hear from you, we thought it might be helpful to summarize the top questions we have received over the years and give you the answers here.

Q: “Can I buy directly from the factory?”
A: No. We sell through a dealer network to ensure excellent sales and service of our product. In fact, because many states and provinces legally require certain checks be performed by a retailing dealer, you cannot even take delivery at the factory. Arrangements can be made through your local dealer, however, to take delivery at our local Kitchener dealer, or one in New York state or Michigan.

Q: “Can a U.S. resident buy in Canada?”
A: A U.S. resident needs a Roadtrek built to U.S. specifications. Canadian units are not built to U.S. specifications.

Q: “Why do Roadtreks cost more than some class ‘C’ motor homes and low end class ‘A’s? Why don’t they cost less, considering the size difference?”
A: Roadtreks are more expensive to build because of the higher costs of manufacturing the “exterior shell”, building on the inside, adapting to unusual shapes, and working with limited space.

Q: “Why is it more expensive to manufacture the ‘exterior shell’ of a Roadtrek?”
A: Many class ‘C’ motor homes consist of an incomplete chassis cab and rail to which a flat floor, straight fibreglass walls and flat roof are added. A Roadtrek starts with a complete van body from which the roof is removed and replaced with a higher molded fibreglass roof. Also a section of the floor is removed and replaced with a custom lowered floor. Other additional modifications are also required, but these two are the most costly and time consuming.

Q: “Why is it more expensive to build from the inside of a Roadtrek?”
A: With most class ‘C’s, the interior is installed first from the outside with the walls and roof added after. This is less costly than Roadtreks which must be built within the confines of the exterior.

Q: “How do ‘unusual shapes’ and working within limited space increase the cost of a Roadtrek?”
A: It is much easier to adapt interior cabinets and components to the square fibreglass “box” of a class ‘C’ than to the unusual curved shape of the Roadtrek’s interior. In addition, it is more difficult to get all the equipment to fit comfortably within the limited space of a Roadtrek and, when off the shelf items are not suitable, it’s often more expensive to get custom made or modified components such as water tanks and LP gas tanks.

Q: “Is the water system designed for winter use?”
A: The fresh water tank and lines and water heater should not be used in below freezing temperatures. However, you can still use the sink and toilet by carrying a fresh water supply inside the vehicle and using RV anti-freeze in the black and grey water tanks.

Q: “Is the Dodge available with a diesel engine?”
A: No. The Cummins turbo diesel that is available in Dodge pickups is too large for the engine bay of the Dodge van.

Q: “Can it be built to accommodate a wheelchair?”
A: Although a wheelchair lift is not available from Home & Park, your Roadtrek can be built with a level floor and one or more seats removed to accommodate installation by an after market company.

Q: “Can the generator run the air conditioner and microwave at the same time?”
A: Yes, as long as you start the air conditioner first.
